

# INSTALLATION AND OPERATING INSTRUCTIONS

KEEP ALL PLASTIC AND WIRE PARTS AWAY FROM CHILDREN

## Setup Instructions: Spider Web Mummy

### PARTS:

1. Body and Module with Strap
2. Pole (2)

- 1.) Find velcro opening on front of Mummy and carefully pull fabric apart. Find upper and lower poles inside.

(See illustration 1a & 1b)

- 2.) Connect upper and lower poles until they snap lock together, then seal velcro back together.

- 3.) Insert 4 brand new AA batteries into battery compartment on MODULE located at the end of Mummy's feet.

- 4.) Wrap velcro strap over the top of the mounting object, down through the bracket loop on the side of the module, back up over the mounting object and adhere to the velcro strip on the opposite side of the module. Pull strap very tight when securing to make sure Module is secured well; this will greatly improve movement.

**Note:** Turn the switch located on the Module box to the "ON" position. Clap or make loud sound to activate the item. Leave the switch in the "OFF" position when not in use to preserve the life of the batteries.

**Outdoor Warnings:** For best overall performance, we recommend you operate your item in a sheltered outdoor area. We also recommend you bring your item indoors during adverse weather (extreme cold, strong winds and/or rain). This item operates best outdoors in temperatures above freezing (32°F). Tekky Toys recommends using fresh alkaline batteries for best operating performance.
