

Easy to Follow Instructions

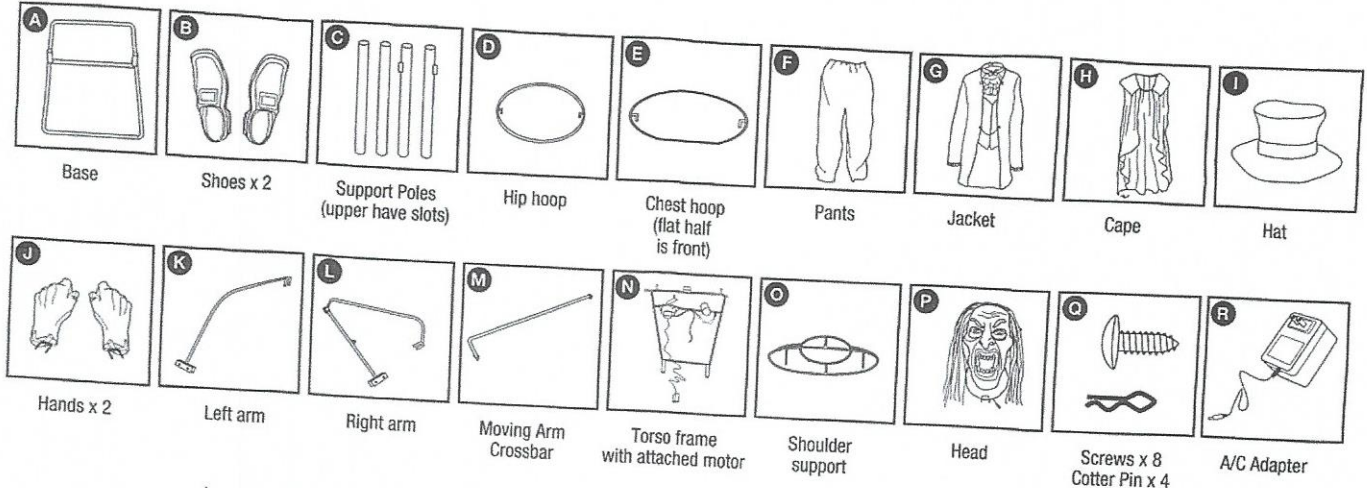

5124149 Count Von Mortis

Please read all instructions carefully before assembling.

Care & Storage Instructions: Store product in its original package. Keep away from heat & moisture. For indoor use only. Save instruction sheet for future reference.

This item, when assembled by the following instructions, should take 15 minutes to assemble. Please follow the step by step guide and enjoy your Count Von Mortis!

Parts List:

A/C Adapter Specification:
Input: 120V~ 60Hz
Output: 6VDC 800mA

Only use adapter with same technical specifications.

⚠ PROP 65 WARNING:

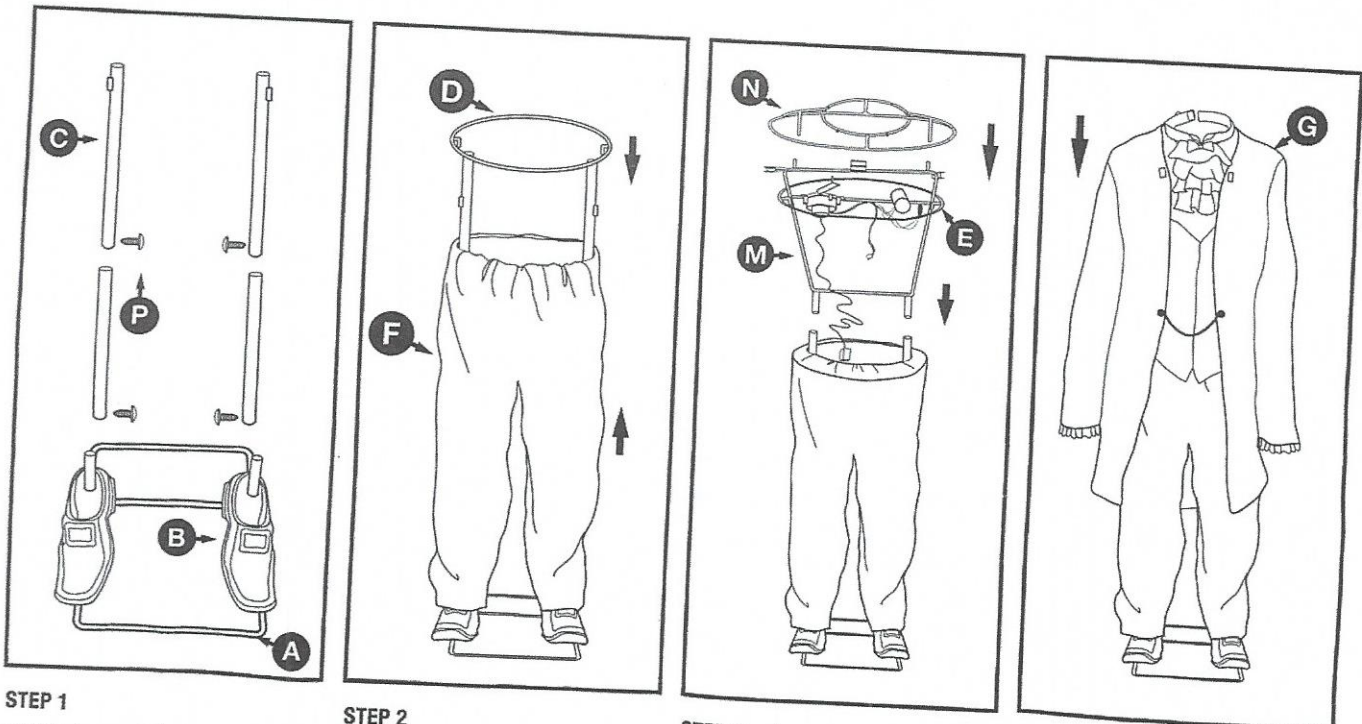

Handling the coated electrical wires of this product exposes you to lead, a chemical known to the State of California to cause cancer, birth defects or other reproductive harm. Wash hands after use.

Caution: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or experienced radio/TV technician for help.

Assembly Instructions:

Note: You will need a Phillips Head Screwdriver (not included)

STEP 1

NOTE: The longer end of the Base goes towards the front. First, slide Shoes onto the Base and then assemble the Support Poles through the tops of the Shoes as shown, with the slots housings of the upper poles facing outward. Insert screws through Support Poles and tighten to secure.

STEP 2

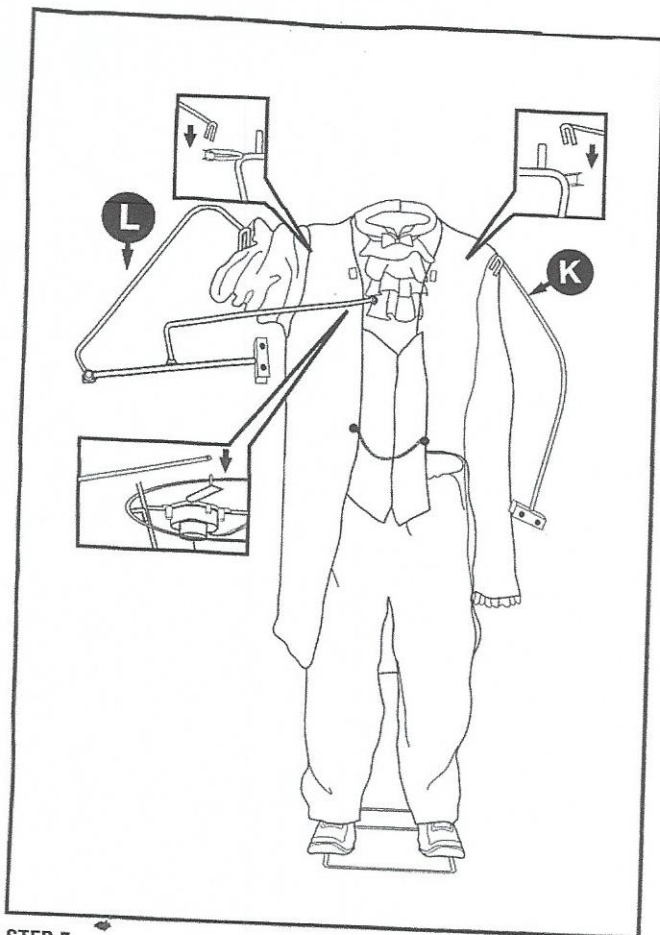

Lower Pants over Support Poles through the leg openings & out through the top of the Pants. Attach the Hip Hoop through the slots on the upper Support Poles as shown.

STEP 3

Assemble the Torso Frame onto the upper Support Poles as shown and insert screws and tighten to secure. Pull up the Pants over the Hip Hoop and route the power cord through and out the bottom of the right pant leg. Attach the Chest Hoop through the slots located on the Torso Frame, with the larger part of the Chest Hoop in front. Attach the Shoulder Support as shown.

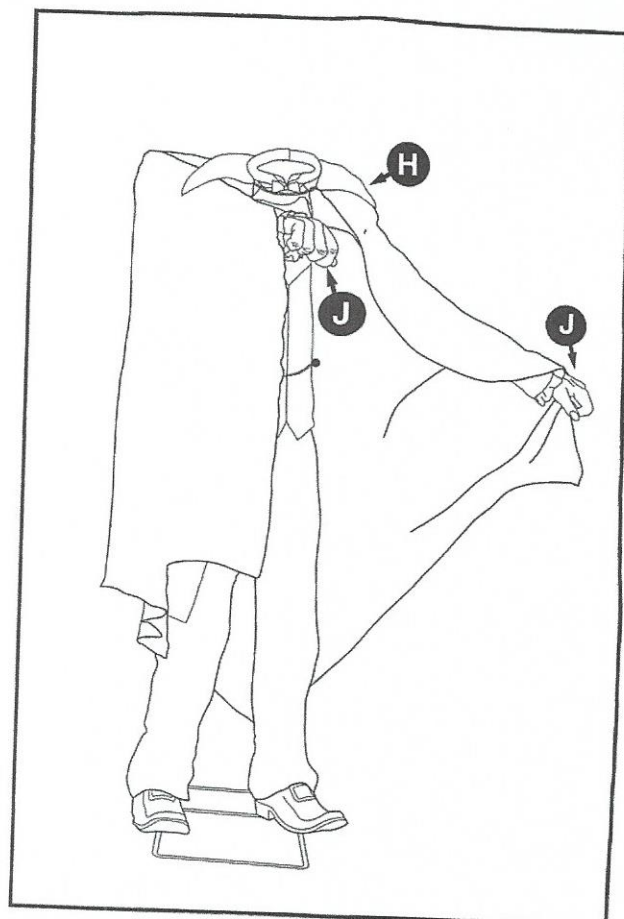

STEP 4

Lower the Jacket down over the Torso Frame & Shoulder Piece, and leave the back of the Jacket open. Slide the Left Arm up through the left sleeve of the Jacket and insert the forked-hook into the left "shoulder" slot housing on the Torso Frame.

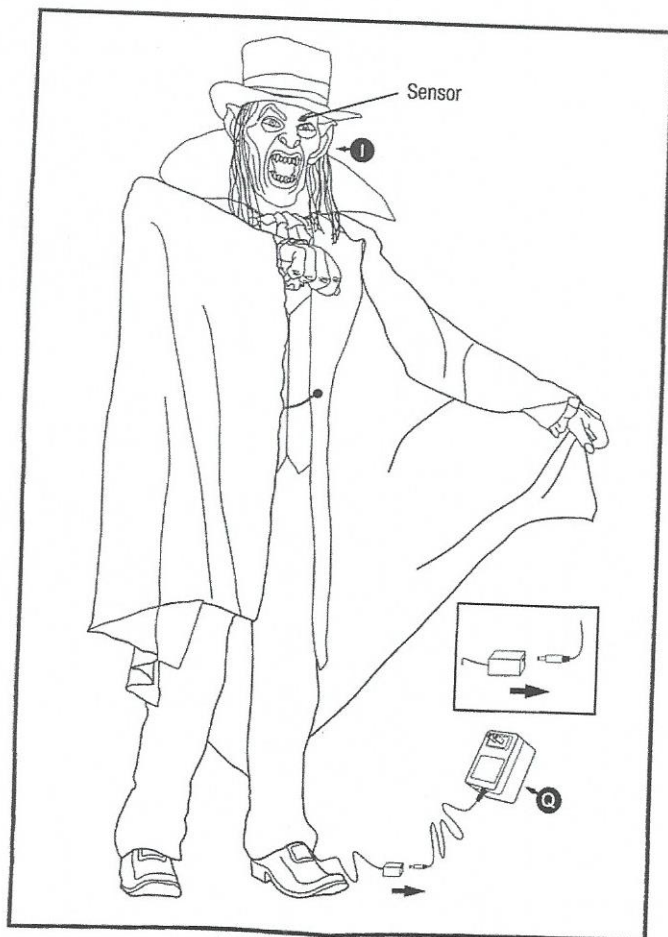

STEP 5

Slide the Right Arm up through the right sleeve of the Jacket and insert the forked-hook into the right "shoulder" slot housing on the Torso Frame. Connect the hooked end of the Moving Arm Cross Bar to the slot housing in the center of the forearm as shown, and then attach the other end to the rotating shaft on the motor & secure both ends with included cotter pins.

STEP 6

Set the right & left hands into place by sliding the forked-hooks into the "wrist" slot housings on the ends of the arms. Next, drape the Cape over the back of the Jacket and secure with the hook & loop fasteners at the neck & at the hands. NOTE: The neck chain on the Cape has a removable elastic loop that fits around the right button for easier assembly.

STEP 7

Set the head onto the torso frame by sliding the forked-hook into the "neck" slot housing. Carefully connect the connecting wire from the head to the connecting wire from the motor. Now secure the costume & bowtie into place around the neck by fastening the hook & loop closures at the back of the neck. Place the Hat on the Head. Attach the A/C adaptor to the power cord routed through the right leg & plug into standard outlet to operate. When plugged into a standard outlet, lights and sounds are activated by a light-activated sensor.

NOTE: Sensors are Light activated & work best in brighter environments. TIP: For best results, position a light to shine at the sensor so that people will have to pass between the light source & the character – their shadow will activate the functions of the character.
