

This diagram illustrates how to fire off a BooTunes with a PicoBoo Jr (103) or PicoBoo (104). When output 1 is activated the BooTunes will play the input 1 MP3 file. You can also share output 1 on the PicoBoo with another 12v device such as a solenoid. However, do not share output 1 with a 110v AC device because that will damage the BooTunes.

## ACTIVATING A BOOTUNES FROM A PICOBOO
